EDUCATION

MS, HCI Design
Indiana University, Bloomington (USA)

For 14 years, I've built API documentation and developer experiences that scale. Most recently at BILL, I built an AI agent-ready docs platform.

EXPERIENCE

BILL / Sr Staff Technical Writer

July 2021 – June 2026, San Jose, CA

OWNERSHIP: Owned all documentation on developer.bill.com and OpenAPI spec management for ~600 endpoints across v2 and v3.

OPENAPI: Wrote the v2 OpenAPI spec from scratch in 3 months (178,000 lines, 270+ endpoints), which became the foundation for v3.

POSTMAN: Built a custom integration in 3 weeks with AI to build and publish the v3 API Postman Collection, with a CI/CD pipeline that keeps it current with each API release.

YOUTUBE: Wrote 16 developer tutorial scripts (11 live on YouTube); recorded, edited, and published 2 videos.

AI TOOLING: Published 4 Claude skills, an llms.txt, and an MCP server to make the docs usable by AI agents.

OUTCOMES: Grew the active API developer base to 2500+ (192% of OKR) and contributed to 130% of the revenue OKR.

Clover Network Inc / Staff Technical Writer
